

# Bullet Resistant Protection Level Ratings

<b>IMPORTANT NOTE!</b> Regarding U.L. 752 Protection Levels Assessment Protection Levels assigned to various products listed as "Bullet Resistant" are based on testing recognized under the standards established by Underwriters' Laboratories (U.L. 752) for bullet resisting components. Protection Levels listed for options available for Exchange Windows pertain only to the option itself. A Level 1 option used with a Level 3 option will yield an overall Protection Level for the lowest rated option or component.
